

Benefits

By using the Magic Peeling Exfoliator Glove® at least once a week, you exfoliate your skin deep down, making it more radiant and elastic. Over the years, and specifically between the ages of 25-30, the cell renewal process slows down. This means our skin starts to look dull, with an uneven thickened texture. In some cases, our complexion can look uneven, because dead skin cells build up on the surface. Also contact with pollutant particles can negatively affect cell turnover. Simply put, our skin needs exfoliation to slow down aging. Our skin needs the Magic Peeling Exfoliator Glove®!

The number of people who suffer from hypersensitivity and allergies continues to rise.

Delicate, vulnerable skin with a tendency to redden easily is an issue for many people. Problems with fragile capillaries, irritability, allergies, and dry dehydrated skin are the characteristics of hypersensitive skin, and dermatologists have noted a constant increase of people with this kind of skin. The Magic Peeling Exfoliator Glove® helps fight these everyday occurrences by keeping the skin healthy and fresh. It improves blood flow to the specific areas in which it is used and promotes all over well being for the skin.

****The Magic Peeling Exfoliator Glove® is recommended:**

- Before using any treatment product (anti-wrinkle cream, moisturizer, nourishing cream, anti-cellulite). By unclogging the pores, it allows the active principles in the creams to penetrate more deeply, increasing their effectiveness.

- For cellulite in particular. The benefits are doubled due to the massaging action, which stimulates microcirculation.

- Before hair removal. The Magic Peeling Exfoliator Glove® perfectly prepares the area to be treated, freeing ingrown hairs .

- For extraordinary effectiveness against stretch marks.

- For skin that has suffered from acne. (with the same results as peeling procedures performed using more aggressive traditional methods such as chemiclas).

- **If your back, legs and arms have blemishes, pimples or particularly rough skin, the Magic Peeling Glove® will instantly make your skin smooth and soft. If your facial skin looks dull and lifeless, Magic Peeling will restore a healthy, radiant complexion.

The Magic Peeling Exfoliator Glove® also works wonderfully for those wishing to maintain a healthier, longer lasting tan.

- It prepares your skin for the sun. Skin that has been cleansed of old cells tans better and more evenly. You will keep your tan longer

- Keep your skin looking beautiful during the summer. When you start to peel after tanning, a massage with the Magic Peeling Exfoliator Glove® quickly gets rid of unsightly flaky skin. Your skin will immediately look smoother and more radiant, and it will stay in excellent shape so that, day after day, you can receive a deep and even tan

- Helps prevent sun spots (i.e. dark spots and age spots).
